Insurance: Mathematics and Economics 2 (1983) 289
North-Holland

Author Index Volume 2 (1983)

(The issue number is given in front of page numbers)

Albrecht, P., Parametric multiple regression risk models: Theory and statistical analysis (1) 49–66
Albrecht, P., Parametric multiple regression risk models: Some connections with IBNR (2) 69–73
Albrecht, P., Parametric multiple regression risk models: Connections with tariffication, especially in motor insurance (2) 113–117

Balcer, Y. and **I. Sahin,** A stochastic theory of pension dynamics (3) 179–197
Brodt, A.I., MIN-MAD Life: A multi-period optimalization model for life insurance company investment decisions (2) 91–102
Buser, S.A. and **M.L. Smith,** Life insurance in a portfolio context (3) 147–157

Chan, L.K. and **H.H. Panjer,** A statistical approach to graduation by mathematical formula (1) 33–47
Chossy, R. von and **G. Rappl,** Some approximation methods for the distribution of random sums (4) 251–270

Delbaen, F. and **J. Haezendonck,** On risk processes with the Markov property and with independent increments (2) 81–90
Delbaen, F., see **K. Jansen** (4) 227–240
De Pril, N. and **M. Goovaerts,** Bounds for the optimal critical claim size of a bonus system (1) 27–32
De Vylder, F., Maximization, under equality constraints, of a functional of a probability distribution (1) 1–16
De Vylder, F., Bounds on integrals: Elimination of the dual and reduction of the number of equality constraints. (3) 139–145
De Vylder, F. and **M. Goovaerts,** Maximization of the variance of a stop-loss reinsured risk (2) 75–80
De Vylder, F. and **M. Goovaerts,** Best bounds on the stop-loss premium in case of known range, expectation variance and mode of the risk (4) 241–249

Goovaerts, M., see **N. De Pril** (1) 27–32
Goovaerts, M., see **F. De Vylder** (2) 75–80
Goovaerts, M., see **F. De Vylder** (4) 241–249

Haberman, S., Time series analysis of the probability of survival as unemployed (4) 215–225
Haezendonck, J., see **F. Delbaen** (2) 81–90
Haezendonck, J., see **K. Jansen** (4) 227–240
Herzog, T.N., Bayesian graduation of FHA/HUD single-family home mortgage insurance contracts – Section 203 (4) 271–279

Jansen, K., J. Haezendonck and **F. Delbaen,** Limit distributions for risk processes in case of claim amounts of finite expectation (4) 227–240
Jong, P. de and **B. Zehnwirth,** Credibility theory and the Kalman filter (4) 281–286

Kremer, E., Distribution-free upper bounds on the premiums of the LCR and ECOMOR treaties (3) 209–213
Kroll, Y., Efficiency analysis of deductible insurance policies (2) 119–137

Lewy, H., see **I. Venezia** (3) 199–208
Lutek, B.W., see **H.H. Panjer** (2) 159–177

Panjer, H.H. and **B.W. Lutek,** Practical aspects of stop-loss calculations (3) 159–177
Panjer, H.H., see **L.K. Chan** (1) 33–47

Rappl, G., see **R. von Chossy** (4) 251–270

Sahin, I., see **Y. Balcer** (3) 179–197
Smith, M.L., see **S.A. Buser** (3) 147–157
Seal, H.L., The Poisson process: Its failure in risk theory (4) 287–288

Tapiero, C.S. and **D. Zuckerman,** Optimal investment policy of an insurance firm (2) 103–112

Venezia, I. and **H. Lewy,** Optimal multi-period insurance contracts (3) 199–208

Waters, H.R., Some mathematical aspects of reinsurance (1) 17–26

Zehnwirth, B., see **P. de Jong** (4) 281–286
Zuckerman, D., see **C.S. Tapiero** (2) 103–112
